

Ranking Basics

Athletes

Only TWA-registered athletes with a valid Athlete-ID are listed in the individual rankings. It is a revolving system on yearly basis, updates are published every month. Actual score of an athlete is the sum of the eight pointbest results within the last year.

Races

Precondition for race evaluation is a filled TWA Results Form, which has to be available within a week after race date. The Results Form should be provided by race organization, but interested athletes are invited to support us too.

Evaluation

Points are awarded according to the factor-related columns of our Scoring Matrix..

The predefined eventual race factor (40, 60, 80, 120, 160, 200, 280) is communicated before the event on our 'Races'-page.

Generally only the longest offered distance is evaluated (Triple Climb, Power Hour,...)

The pointbest two females and males of a country are considered for the Nations Cup, even if the respective athletes are not registered.
